

S02-B Counter Drone Equipment

Description

By sending a stronger signal to the drone, it forces the drone itself to receive interference and cannot communicate normally. When the UAV loses the signal, it will make corresponding reactions, such as landing and turning back.

So, this is one of the most common electromagnetic wave soft killing equipment.

Features

- The maximum total power of the device is 800W
- It can output signals of 4 channels at the same time with 100W
- Waterproof aluminum case structure, equipped with active heat dissipation
- 360° omnidirectional defense

Application

- Border defense
- Camp Protection
- Large-scale security activity
- Key security area
- Farm guard
- Private club

Specification

Parameter	Parameter values
Product model	S02-B
Working frequency	900M, 1.5G, 2.4G , 5.8G
Single signal power	50dB(100W)
Antenna gain	2 to 6 dBi
Working range	1000 to 1500m
Azimuth range	360°
Number of fans	8
Power supply	AC 220V
Total power	≤800W
Protection level	IP65
Working temprature	-30℃ to 60℃
Host dimension	≤430mm×350mm×480mm
Host weight	≤38Kg
